I know Pat H/Diego are planning to send some additional information on the wind tunnel study very soon. I hope it's what's needed.

Hi Kay,

We do have copies. We have not looked at the ESA yet. Faruque had already communicated with you some things that were missing from the wind tunnel study. Hopefully you have followed up with the registrant to obtain those missing pieces.

Looking forward to figuring out the timeline for everything!

Meghan

Hi, Megan,

I just got the following from the front end:

- Low-speed wind tunnel droplet size spectrum determinations, MRID #49384801

Emily will be back on Monday, and she can check on the ESA piece and bean the droplet study. Do you have the courtesy copies of each to work on in the meantime?

Thanks,
Kay

Hi Kay,

Sujatha asked me to follow up on the beans for the low wind speed tunnel droplet size spectrum study and for the endangered species analysis (is there an MRID yet for the ESA?). We haven't received one for either study.

Thanks!

Meghan

Hi, Sujatha,

I also just received the "Low-speed Wind Tunnel Droplet Size Spectrum Determinations with GF-2726" document from the front-end. I believe you already have the courtesy copy. The MRID for this is 49384801. I assume you already have a bean for this one??

Thanks,

Kay

Hi Sujatha,

I received this from Diego and wanted to get it to you as soon as possible. I assume it will be coming in through the front end. Would you like for me to bean it when it does?

Thanks,

Emily
